

Alireza Nezami

Senior Android & Flutter Developer

EU Remote / Istanbul, Türkiye | alireza.nezami75@gmail.com | alirezanezami96.github.io/AlirezaNezami | linkedin.com/in/alireza-nezami | +90 (543) 743 7966

Senior Mobile Engineer with **9+ years** of expertise developing **high-performance** Android & Flutter applications for millions of users. Proven track record at **Devotel** and **Golden Equator Group** architecting modular systems using **Flutter, Kotlin, Kotlin Multiplatform, Jetpack Compose**, and **MVI/MVVM**. Expert in **optimizing app performance**, evidenced by a **35% reduction** in build times and a **60% reduction** in crash rates. Strong advocate for **Clean Architecture, SOLID principles, TDD**, and **Agile/Scrum**, with extensive experience leading international remote teams.

TECHNICAL SKILLS

Languages: Kotlin, Dart, Java, SQL, XML

Mobile Frameworks: Flutter, Jetpack Compose, Android SDK, Kotlin Multiplatform (KMM), Compose Multiplatform

Architecture: MVVM, MVI, Clean Architecture, Multi-module Architecture, SOLID Principles, Dependency Injection (Dagger-Hilt)

State Management: Bloc, Provider, Riverpod

Android Jetpack & Reactive: Coroutines, Flow, LiveData, Room, DataStore, WorkManager, Jetpack Navigation

Performance: Baseline Profiles, Macrobenchmark, ProGuard/R8, LeakCanary

Networking & APIs: REST APIs, Retrofit, OkHttp, GraphQL, WebSockets

Testing: JUnit, Mockk, Espresso, Robolectric

Tools & DevOps: Git, Gradle, GitHub Actions, Jenkins, Fastlane, CI/CD, Firebase (Crashlytics, Analytics, Firestore, Authentication, Remote Config), Android Studio

WORK EXPERIENCE

Devotel

Senior Android & Flutter Developer | April 2024 – Present | Remote

- Led development of a Flutter fitness & habit-tracking app (Bloc/Provider, Clean Architecture) serving **400K+ MAU**, achieving a **4.7** Play Store rating
- Architected a scalable, modular **MVVM/MVI** codebase following **SOLID principles**, improving long-term maintainability and team velocity
- Built native Kotlin **Platform Channel** modules for real-time audio DSP signal processing, bridging Flutter and native Android layers
- Optimized **CI/CD pipelines** (GitHub Actions, Fastlane) with automated integration and unit tests, raising code coverage to **85%**
- Reduced build times by **35%** through Gradle optimization and modularization
- Mentored **5 junior engineers** on Flutter/Android best practices, Agile/Scrum workflows, and code reviews

Golden Equator Group

Senior Android Developer (Contract) | September 2023 – April 2024 | Remote

- Developed and maintained **3 enterprise Android applications** (Java → Kotlin migration) used by **500K+ users** in the data analytics domain
- Designed responsive UI/UX with ConstraintLayout, **Material Design 3**, and **Data Binding**, improving user retention by **28%**
- Built an **offline-first architecture** using **Room, DataStore, WorkManager**, and Sync Adapters for real-time data synchronization
- Optimized network layer with **Retrofit, OkHttp**, and caching strategies, reducing API latency by **50%**

Solid-ICT

Senior Android Developer (Contract) | October 2022 – September 2023 | Remote

- Reduced **app startup time by 42%** through lazy loading, **Baseline Profiles**, and **ProGuard/R8** optimization

- Eliminated memory leaks using **LeakCanary**, improving crash stability alongside a **60% crash-rate reduction**
- Integrated **Firebase** (Firestore, Authentication, Analytics, Crashlytics, Remote Config, A/B Testing) and third-party SDKs (Stripe, Google Maps)
- Collaborated with backend (Node.js, Python) and iOS teams via **RESTful APIs** and **GraphQL**

Raychat

Android Developer | August 2017 – September 2022 | Hybrid

- Implemented a **high-performance real-time SDK** in Java with **WebSocket** optimization for live messaging at scale
- Facilitated seamless integration for **third-party developers**, increasing adoption rate by **40%** within the first quarter of launch
- Architected a **modular framework** with XML, streamlining feature integration and ensuring long-term scalability

PROJECTS

papyon_courier — *Flutter Delivery & Live Tracking App*

- Flutter app with **MQTT-based real-time location tracking**, Firebase (Crashlytics, Firestore, Analytics), and Clean Architecture
- Handles **ProGuard/R8** release signing and full Play Store deployment pipeline end-to-end
- Demonstrates production ownership across architecture, live data, and release management — independently shipped

EDUCATION

Bachelor of Science in Computer Science

Tabriz Technical College • Tabriz, Iran
